

06 — Codebase Ownership

Who owns which area of the code. Names, contacts, and module ownership for the SmartFix team.

Team members

Name	Primary role	Email	Phone
Vijay V S	Backend / integration / DevEx	vijay080504@gmail.com	+91 63833 38499
Eshita Kasera	Frontend / UI design	eshita.kasera70@gmail.com	+91 78785 01935
Mohammed Ehtishaam T (ehtisham2005)	Backend / RAG pipeline / analytics	ehiti1233@gmail.com	+91 88257 76241
Govind Tiwari	QA + testing — end-to-end flows, regression, release sign-off	govindtiwari1705@gmail.com	+91 96254 44565

Module-level ownership

Read the table as: "if this directory or file breaks, who is the first person to ping?"

Backend (`src/`)

Path	Primary owner	Secondary	Notes
<code>src/api.py</code>	Vijay	ehtisham2005	The whole HTTP surface lives here. Recent additions: admin gating, machine PATCH, shift voiding, alert ack/snooze, runtime config, custom icon serving.
<code>src/store.py</code>	Vijay	ehtisham2005	SQLite schema, migrations, anomaly compute, shift-log CRUD.
<code>src/db.py</code>	Vijay	—	Chroma persistent client wiring.
<code>src/retriever.py</code>	ehtisham2005	—	Embed-query + Chroma similarity search.
<code>src/rag_pipeline.py</code>	ehtisham2005	Vijay	Glues retriever + prompt builder + LLM
<code>src/llm_client.py</code>	ehtisham2005	Vijay	Groq client + error mapping.
<code>src/prompt_builder.py</code>	ehtisham2005	—	System + user prompt assembly. See supplementary/SYSTEM_PROMPT.md .
<code>src/audit.py</code>	Vijay	—	Append-only JSONL audit log.
<code>src/mailer.py</code>	Vijay	—	Resend integration: magic-link + alert emails.
<code>src/workstations.py</code>	Vijay	—	IP → machine binding.
<code>src/ingestion/</code>	ehtisham2005	—	PDF parse + chunk for Chroma. See supplementary/CHUNKING_STRATEGY.md

Frontend (frontend/src/)

Path	Primary owner	Secondary	Notes
pages/AdminDashboard.jsx	Vijay + Eshita	—	Largest file. Vijay owns the logic / wiring; Eshita owns the visual design + tab layouts. Coordinate before large rewrites.
pages/AdminLogin.jsx	Vijay	Eshita	Split-card sign-in.
pages/LandingPage.jsx	Eshita	Vijay	Marketing hero + scroll-hijack carousel.
pages/ChatPage.jsx	Vijay	Eshita	Worker chat + sidebar.
pages/MachinesPage.jsx	Eshita	Vijay	Worker-facing machine list.
pages/FeaturesPage.jsx / IntegrationsPage.jsx / ContactPage.jsx	Eshita	—	Marketing.
pages/Cookie/Privacy/Data/LegalNotice	Eshita	—	Legal stubs.
components/MachineCard.jsx	Vijay	Eshita	Expand-in-place card.
components/MachineDetailModal.jsx	Vijay	—	Admin parameter editor + metadata edit + re-ingest button.
components/EndShiftModal.jsx	Vijay	—	Phase-aware shift log form.
components/HandoffBanner.jsx	Vijay	—	Previous-shift anomaly banner.
components/ShiftLogsPanel.jsx	Vijay	Eshita	Admin shift logs table + void UI.
components/Navbar.jsx	Eshita	Vijay	Top nav + Start/End Shift buttons.
components/Footer.jsx	Eshita	—	Marketing footer.
components/BrandMark.jsx	Vijay	Eshita	Inline Tecdia SVG wordmark.
components/MessageContent.jsx	Vijay	—	LLM message renderer (markdown + sources).
components/StartDiagnosingModal.jsx	Eshita	Vijay	Landing-page chat entry modal.

Path	Primary owner	Secondary	Notes
context/AuthContext.jsx / AdminAuthContext.jsx	Vijay	—	Session state.
context/MachineContext.jsx	Vijay	—	Machine list + CRUD wrappers.
context/AlertContext.jsx	Vijay	—	Alert list + ack + snooze.
context/StartDiagnosingContext.jsx	Eshita	—	Modal open state.
hooks/useChatHistory.js	Vijay	—	Per-machine chat persistence (localStorage).
hooks/useWorkstation.js	Vijay	—	Workstation-binding fetch.
api/apiClient.js	Vijay	—	Centralised fetchApi + ApiError.
assets/	Eshita	—	Images, logos, hero photos.
index.css	Eshita	Vijay	Global styles + light-mode theme overrides.
tailwind.config.js	Eshita	—	Tecdia color palette.
vite.config.js	Vijay	—	Dev proxy.

Infra + deploy

Path	Primary owner	Secondary
Dockerfile	Vijay	—
frontend/Dockerfile	Vijay	—
frontend/nginx.conf	Vijay	—
docker-compose.yml	Vijay	—
scripts/backup_sqlite.sh	Vijay	—
scripts/build_index.py	ehtisham2005	—
scripts/demo.py	ehtisham2005	—
requirements.txt	shared	—
frontend/package.json	shared	—

Docs (docs/)

Path	Owner
docs/0*.md (this handover set)	the engineer doing the handover
docs/supplementary/	shared — last-touched-it owns it

QA + Testing

Area	Primary owner	Notes
End-to-end worker flow (pre-shift → ask → answer → end-shift)	Govind Tiwari	Manual regression pass before each release.
End-to-end admin flow (login → machines → parameters → alerts → analytics → audit)	Govind Tiwari	Includes the dev-only <code>/auth/_dev/capture-session</code> backdoor verification.
Cross-browser smoke tests (Chrome, Safari, Firefox)	Govind Tiwari	Pay extra attention to the chat streaming + ChromaDB queries on Safari.
Bug reports + repro steps	Govind Tiwari	Filed against the primary owner of the affected module above.
Release sign-off	Govind Tiwari	Final approval before any merge to <code>main</code> .

Active work / known WIP

Updated as of 2026-05-27.

Topic	Owner	Status
Custom machine icon upload (end-to-end)	Vijay	✅ shipped
Pre-shift checklist + handoff banner	Vijay	✅ shipped
Settings tab + runtime config	Vijay	✅ shipped + form validation just added
Admin sign-in redesign	Vijay + Eshita	✅ shipped
Shift classification (<code>_get_shift</code> + analytics filter)	ehtisham2005	✅ shipped
PDF drag-and-drop upload zone	ehtisham2005	✅ shipped
PDF file-type validation	ehtisham2005	✅ shipped
Marketing pages + landing carousel	Eshita	✅ shipped
Logo work (Tecdia wordmark, chat logo, AdminLogin logo)	Eshita	✅ shipped
Shift logs panel — switch off mock data	Vijay	✅ just committed

Coding conventions

When in doubt, match the existing file's style.

- **Backend:** PEP 8, type hints on public functions. Comments explain *why*, not *what*. Inline single-line comments preferred over multi-line docstrings unless the function is API-facing. `_private` underscore prefix for module-level mutable state.
- **Frontend:** JSX (not TS). Tailwind utility classes inline. Component file = single React function + the small helpers it needs. Hooks at the top, derived values next, handlers after, JSX last.
- **Commits:** imperative mood, descriptive body. Atomic — one logical change per commit so revert is clean. Group related WIP into a single commit when pushing.
- **Branches:** everyone works on `dev3`. Pull frequently. Stash before pulling if you have uncommitted work — see `git stash push -u`.

When you're stuck

1. Read the relevant doc in `docs/`.
2. `git log --since="2 weeks ago" -- <file>` to see recent changes and authors.
3. Ping the primary owner from the table above.
4. Backend logic that touches multiple modules: Vijay first.
5. Anything visual / layout / brand: Eshita first.
6. RAG / ingestion / Groq behavior: Md Ehtishaam (`ehtisham2005`) first.
7. A bug you can't reproduce, or "is this expected?" — Govind Tiwari has the regression matrix.
